SLIDING BARN DOORS

SLIDING BARN DOORS

Sliding barn doors are not just for barns anymore. Barn-style doors have come inside and are giving homeowners a fresh, new look on a classic American design.

Rogue Valley Door is bringing the charm of the great American barn and its smart, sliding barn doors into your home with our new collection of barn-style door designs.

From rustic living rooms to contemporary office spaces, our barn-style doors offer your home a unique function as well as great eye appeal. Barn door designs are also perfect as room dividers or for enclosing pantries or laundry rooms.

Functionally, our barn-style doors are big space savers because they require 9 feet of less space than traditional swinging doors. In small spaces where every inch counts, our barn doors are a smart and versatile option.

Aesthetically, barn doors tend to have a rustic feel that creates a contrast inside a modern home while looking very much at home in traditional houses. Whether you use our sliding barn door in your garage, your bedroom, home office or bathroom, we think you will find it stylish and a surprisingly fresh solution.
